## Conception and elaboration : Michel Duncan

### Notes

1. The classification is based by compiling some lists of the best progressive rock studio albums, published by ProgArchives, Ultimate Classic Rock, Rolling Stone, Prog Rock and Discogs.
2. The rank of an album is indicated in the lower left corner.
3. The year of first publication is indicated in the lower right corner.
3. When two or more albums were published on the same day, the one with the best rank is placed on the day of the month and the others on adjacent squares. In such cases the anniversary appears in the upper right corner and the album has a green box.
4. When the release day of an album is not known, the album image is placed on a space without a day and the album has a pink box.
5. The released dates sometimes vary according to the sources used, so there are inevitably erroneous data for some albums. Sorry about that.
